

Teacher Report 5304 Econometrics - Petter Berg

Project Title: **Course Evaluations Fall 2022, period 2**

Courses Audience: **50**

Responses Received: **35**

Response Ratio: **70.0%**

Report Comments

This report is based entirely on students' feedback collected via an online survey at the end of the course. All students registered for the course were invited to take the survey.

All ratings, are on a scale from 1 to 7, where 1 is "disagree strongly" and 7 is "agree strongly".

The report can be distributed as the teacher sees fit.

N.B. If there are course feedback surveys closing after the end of the current study period, this report might be updated.

Please contact SSEquality@hhs.se if you have any questions.

Teacher Questions

1. The teacher effectively advanced and facilitated my learning.

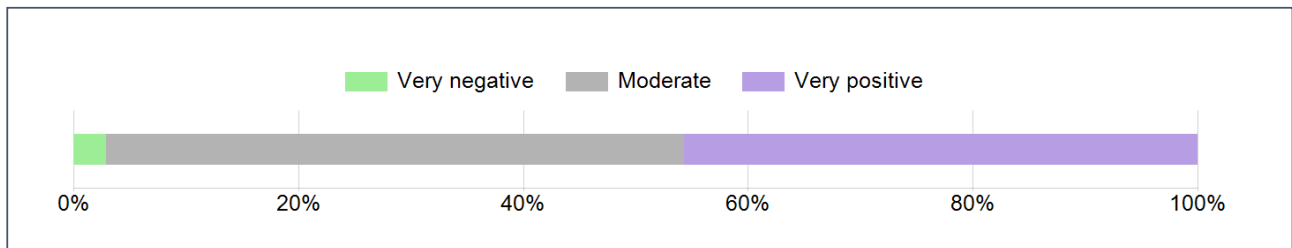

2. I received the help I needed from the teacher in an appropriate time frame.

What concrete feedback do you have regarding the teacher's teaching?

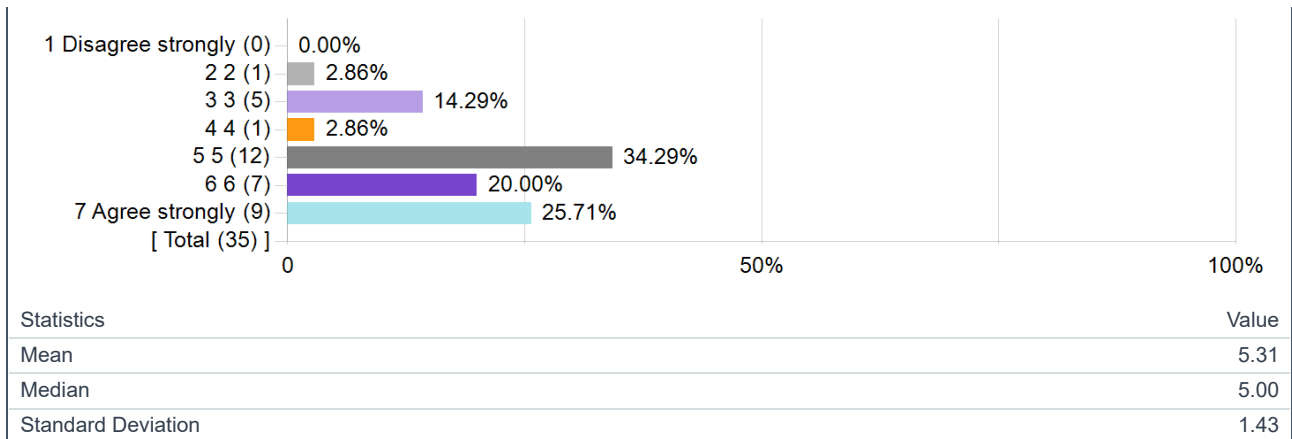

Comments
Good TA!
Petter is doing a great job.
to fast with R introduction. But I feel like it wasn't his fault but rather overall seminars structure problem. 10 people per seminar with R intro and we good.
Petter was very quick to answer emails and very good teacher in his seminars!
Petter has been very helpful and clear in his communication, both in terms of the course material and also general administrative questions.
When you also provide the option to work with R, this should also be covered during the seminars. I know this is a lot and probably not relevant to most of the students in class but it would have been nice. Otherwise, one could think about only using R or Stata for the exercises.
Great! Maybe go through R and STATA more in depth, especially in the beginning. However, I don't really have anything to point out, Petter is great!
– seminars felt redundant since TA went through the coding super quickly and basically just read the solutions which he later uploaded on canvas anyways
Great TA, offered support to students when needed,
I really appreciated the detailed feedback on the problem sets and the amazingly quick responses to any questions we might have. Petter is a natural at presenting and teaching and did a great job of explaining tricky specifications and intricate study designs!
Look at "general strengths/weaknesses"
Great TA!!!!!!
Petter did great. Keep up the good work!
It was good. Sometimes the teaching was a little bit all over the place but I guess metrics is like that.
Not much, he always answered when we had questions and explained clearly.
Very good feedback on assignments, much more elaborate than what I have been experiencing so far. He very much wanted us to pass the course an was very generous with office hours, exam preparations, and answering questions almost immediately on email. I believe that examples of the concepts covered in the course are absolute essential to understand the material. So one easy thing that could have been done is to being up some more examples relating to the problem sets coved (using problem sets from previous years or exams) and going through them on seminars. I believe there was some extra time on some semainars that could have been used. Overall very happy with the seminars and the TA!
Helpful seminars and office hours!

Course Satisfaction (scale distribution)

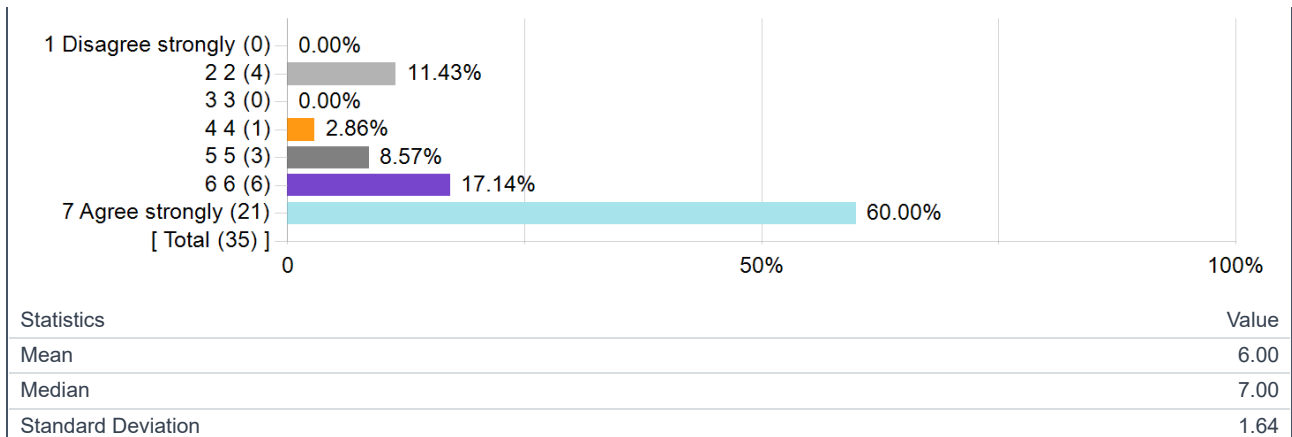

Course Satisfaction

Overall, I am satisfied with the quality of this course.

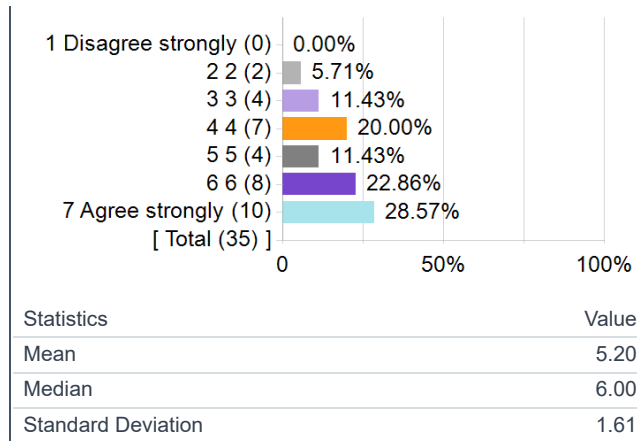

Equality and Diversity

In this course, the teacher(s) actively worked to include different people and perspectives. This was demonstrated in, for example, the selection of course materials, case studies and/or guest speakers as well as during lectures and classroom discussions through balanced speaking time and avoiding stereotypical examples.

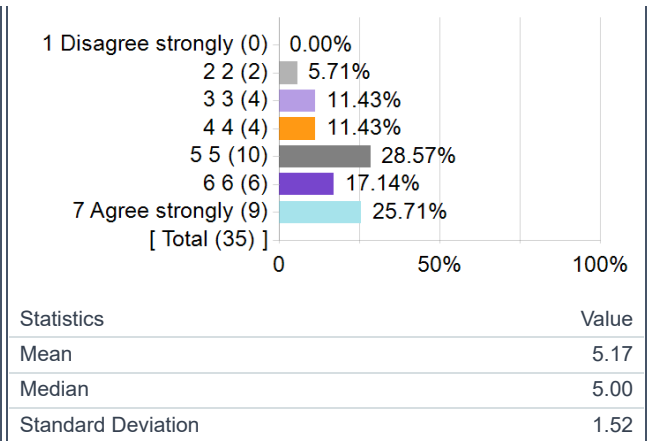

Course Statistics

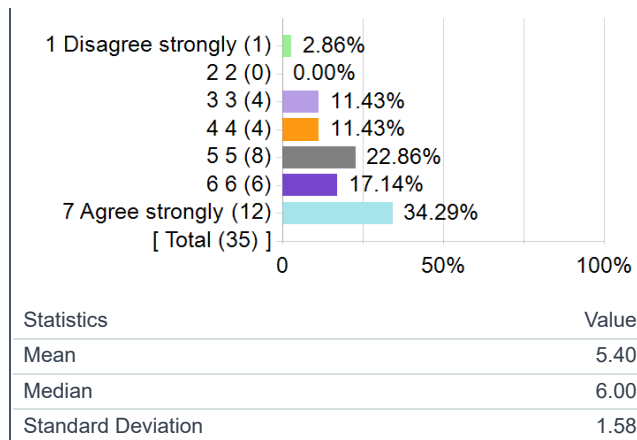

1. I would talk very positively to other students about this course.

2. The course material (literature, lecture notes, videos, cases, etc.) effectively contributed to my learning.

3. I spent enough time and effort on this course to learn effectively.

4. The course was well administrated.
